Questions:

1. How many people liked cheese and green peppers? ____________

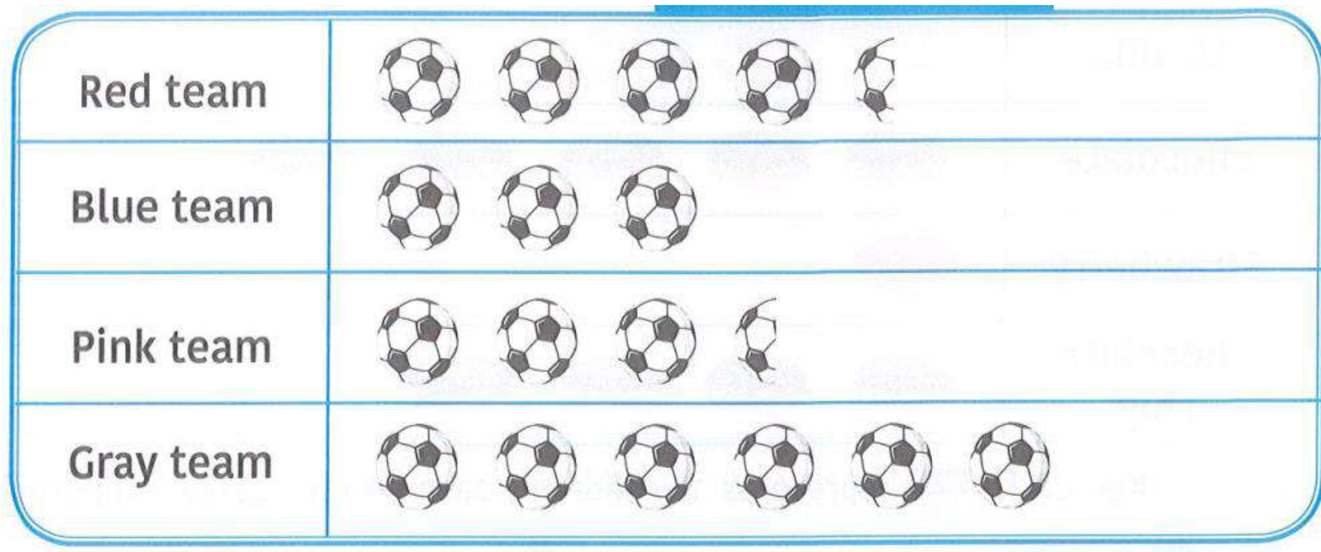

2. How many fewer people liked mushrooms than olives? ____________

3. How many people liked cheese, green peppers, and olives? ____________

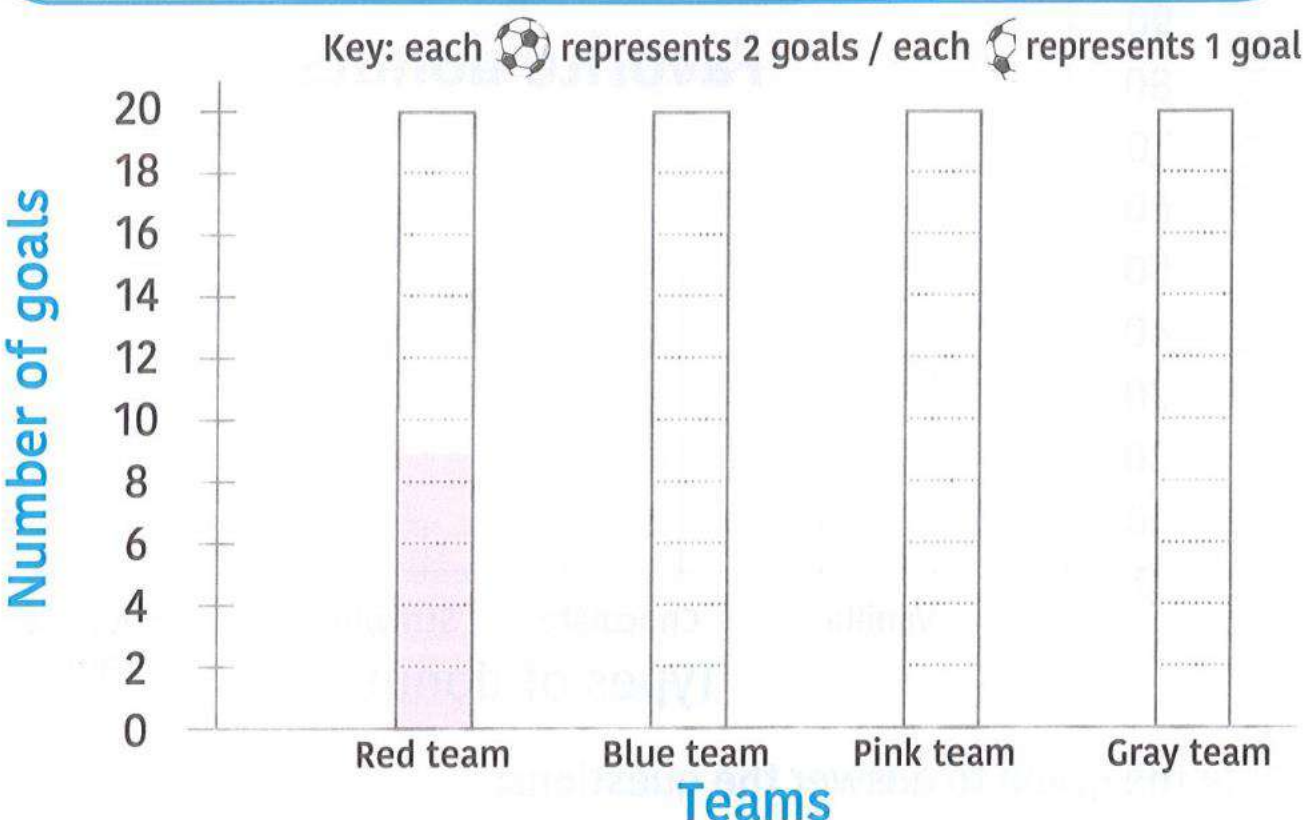

4. How many more people liked cheese than green peppers? ____________

5. What is the most kind pizza topping on this graph? ____________

Look at the pictograph, color the bar graph, and then answer the questions:

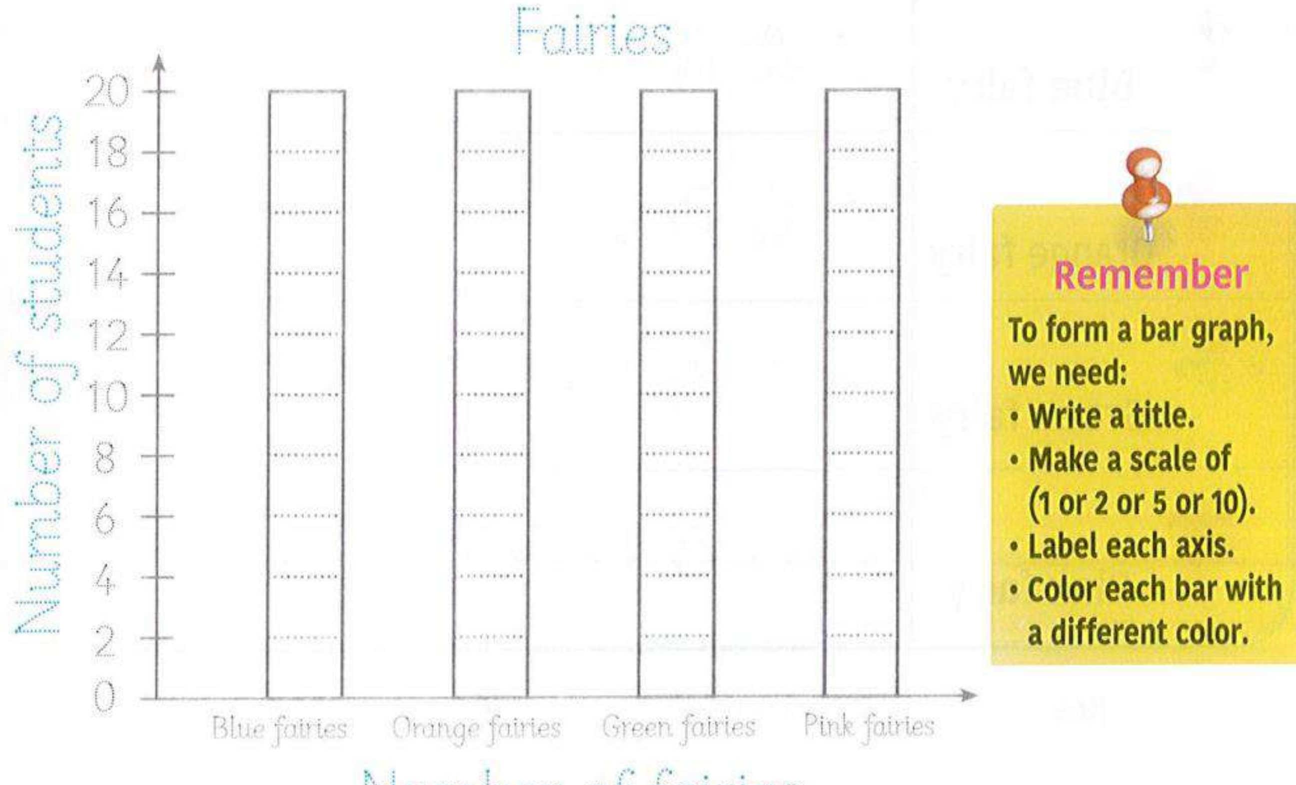

Key: each ⚽ represents 2 goals / each half ⚽ represents 1 goal

- Which team has the most soccer goals? ....
- How many goals did the pink team and blue team score? ....
- How many goals did the gray team score than the blue team? ....
- Which team has the least number of soccer goals? ....

Trace and color to form a bar graph then answer the questions:

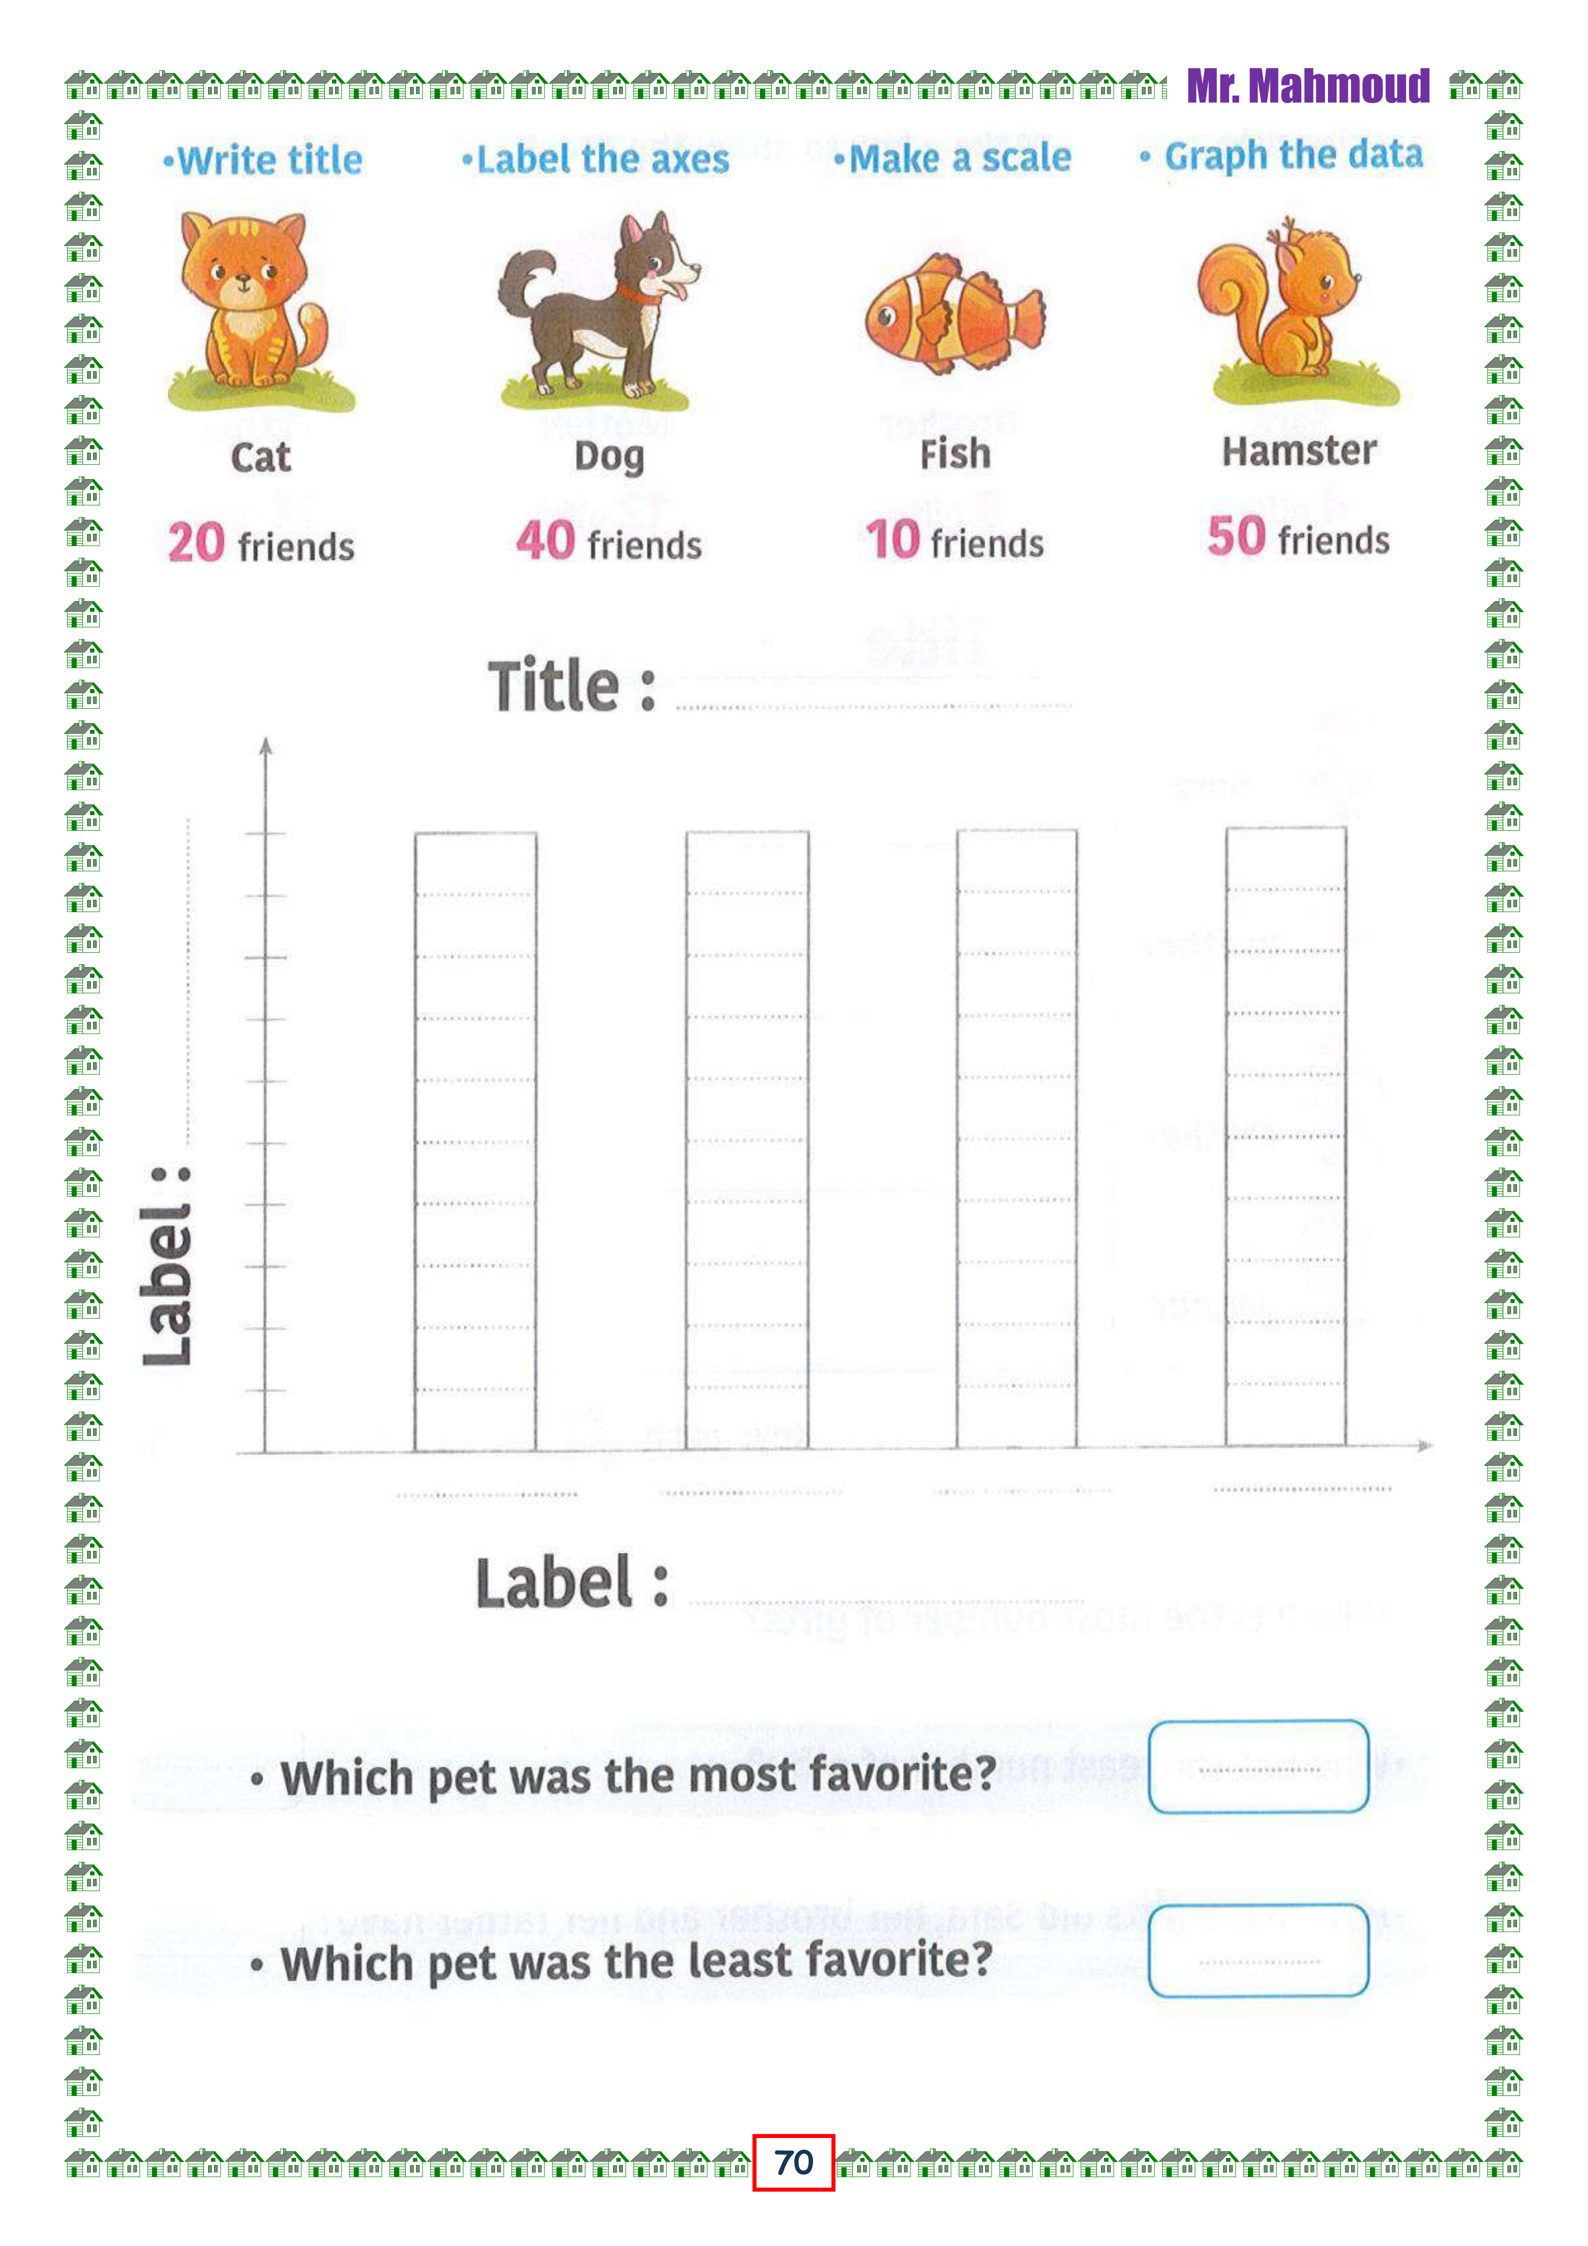

Remember

To form a bar graph, we need:

- Write a title.
- Make a scale of (1 or 2 or 5 or 10).
- Label each axis.
- Color each bar with a different color.

I can represent these data also on a pictograph:

- How many students draw an orange fairy? ....
- How many students draw a green fairy? ....
- How many students draw a blue fairy? ....
- How many students draw a pink fairy? ....

•Write title •Label the axes •Make a scale • Graph the data
